Drug Allergies: No known drug allergies.

Food Allergies: Not mentioned

Other Allergies: Not mentioned

Reaction Details: Not mentioned

9. FAMILY AND SOCIAL HISTORY

Family History: Mother with allergic rhinitis.

Smoking Status: Never smoker.

Alcohol Use: Occasional social alcohol use.

Substance Use: Denies recreational drug use.

Occupation / Exposure Risks: Primary school teacher.

Pregnancy / Lactation Status: Not mentioned

Other Social Factors: Not mentioned

10. VITAL SIGNS

Blood Pressure: 112/70 mmHg

Heart Rate: 84 bpm

Temperature: 37.8 C

Respiratory Rate: 16/min

SpO2: 99% on room air

Weight: 64 kg

Height: 167 cm

BMI: 22.9

11. PHYSICAL EXAMINATION / EXAMINATION FINDINGS

General Appearance:

Not mentioned

Systemic Examination:

Oropharynx mildly erythematous without exudate, cervical lymph nodes mildly tender, lungs clear to auscultation, patient well hydrated and in no acute distress.

12. CLINICAL ASSESSMENT

Primary Diagnosis / Working Diagnosis:

Acute viral pharyngitis.

Differential Diagnoses:

- Streptococcal pharyngitis
- Early upper respiratory tract infection.

Clinical Impression:

Stable outpatient presentation without red flags. Conservative treatment is appropriate.

13. MANAGEMENT PLAN

A. Medications Prescribed

- Medication Name: Paracetamol
- Dose: 500 mg
Route: oral
Frequency: every 6 to 8 hours as needed
Duration: 3 days
Special Instructions: take after food if stomach upset

B. Investigations Ordered

Laboratory Tests:

- Rapid strep test if fever worsens or throat pain persists beyond 72 hours.

Imaging:

- None.

Procedures:

- Not mentioned

C. Referrals

- None.

D. Follow-up Plan

Re-evaluate in 3 to 5 days if symptoms do not improve.

14. PATIENT INSTRUCTIONS

Rest, hydrate well, use warm saline gargles, and avoid sharing utensils until symptoms improve.

15. SAFETY-NET / RETURN PRECAUTIONS

The patient was advised to seek urgent medical attention if any of the following occur:

- Seek urgent care for difficulty breathing
- inability to swallow fluids
- fever above 39 C
- worsening throat swelling.

16. CLINICAL NOTES SUMMARY

Two-day uncomplicated sore throat syndrome most consistent with viral pharyngitis. Supportive outpatient management discussed.

17. DOCUMENTATION GAPS / MISSING BUT RELEVANT INFORMATION

- Exact exposure to known streptococcal infection not confirmed.

18. INTERNAL CLINICIAN REVIEW FLAGS

(Internal use only - do not include in patient-facing printout unless approved)
